| Actively encourage the trainee to reflect about professional practice - enabling them to question and discuss issues in a supportive environment. | | | | | | | | | | | |
| Understand how work-based assessments may be used to assist the trainee in identifying learning needs, analyse progress and guide on-going learning. | | | | | | | | | | | |
| 3. Problem solving | | | | | | | | | | | |
| Identify issues regarding the trainee, their supervision or the workplace that may put the trainee at risk of failing. | | | | | | | | | | | |
| Effectively guide and support the trainee's performance, including dealing with mistakes. | | | | | | | | | | | |
| Effectively manage the trainee where there are concerns. | | | | | | | | | | | |
| 4. Communication | | | | | | | | | | | |
| Know who to approach to discuss problems and develop strategies to resolve any issues. | | | | | | | | | | | |
| Keep appropriate and confidential records of your discussions. | | | | | | | | | | | |
| Effectively manage emotions and emotions of others in interactions, even when tensions or conflict arise. | | | | | | | | | | | |
| 5. Safety and quality | | | | | | | | | | | |
| Develop an approach to clinical supervision that is evidence-based and centred on educational theories. | | | | | | | | | | | |
| Reflect on capabilities as a supervisor including obtaining regular feedback from trainees, peers and seniors as appropriate. | | | | | | | | | | | |
| 6. Organisation | | | | | | | | | | | |
